

Mundo Tours: North American Customer-Acquisition and Booking Engine

A focused U.S. beachhead, assisted-sale journey, and
90-day proof plan

Prepared by SoTech • Internal strategy material

Prove one operating model before widening geography

Houston first

Launch a localized U.S. acquisition system for a narrow audience and five to eight hero offers. Validate acquisition cost, margin, supplier reliability, and sales conversion before expanding.

Houston is a beachhead hypothesis, not a claim that it is the largest MENA opportunity.

Treat North America as a sequence of experiments

01 — Houston / U.S. — Prove one acquisition, sales, and fulfillment playbook

02 — DFW + selected metros — Expand only after economics and service reliability work

03 — Canada / GTA — Validate regulatory and transaction model first

04 — Mexico — Defer until Spanish, MXN, and compliance capabilities exist

Demand supports a test — not a guarantee

The market is large enough to justify a disciplined test. These figures do not prove demand for Mundo specifically.

107.7M — U.S. outbound travelers in 2024

53.8M — Overseas travelers in 2024

3.7M — Texas overseas travelers in the cited survey

109 days — Average overseas planning horizon

Strong product substance; weak North American readiness

Assets to carry forward • Detailed itineraries and inclusions • Private-driver and guided Europe capability • Middle Eastern license and branch proof • Arabic customer-service capability

Gaps to resolve • Arabic-first, SAR-denominated experience • No verified U.S. entity, office, phone, or merchant setup • Ambiguous inquiry-to-booking journey • Visible data-quality defects and attribution gaps

Lead with the problem Mundo is equipped to solve

“Houston-area Arabic-speaking or bilingual MENA families and multigenerational households planning complex Europe trips.”

Need — Reduce planning complexity without losing flexibility

Value — Private drivers, family pacing, and Arabic/English human support

Trust — Clear terms, itinerary specificity, and accountable sales ownership

Choose, package, and prove — do not migrate the catalog

Italy–Switzerland — Family journey

Switzerland–Paris–Disney — Family-focused route

Central Europe — Guided highlights

Northern Italy + Switzerland — Private or self-drive

Spain — Madrid–Barcelona private journey

Balkans — Differentiated family route

Target five to eight offers. International air usually remains separate until ticketing and change operations are proven.

Compete on coordination, not catalog scale

The defensible promise is one accountable team coordinating a complex family journey — not “best prices.”

DIY / OTAs — Low support — High flexibility

Large tour operators — High scale — Low customization

Specialist community agencies — High familiarity — Often religious-travel led

Mundo opportunity — High support — Flexible family Europe

Assisted sale first; transactional booking later

Landing page — Package-specific intent

Quote request — Structured trip inputs

Discovery — Human qualification

Itinerary + quote — Written, supplier-aware offer

Deposit — Terms disclosed

Support — Confirmation through review

Real-time checkout is premature while dates, hotels, private drivers, and supplier-dependent components remain variable.

Build first-party learning before scale

Priority — High-intent Google Search — Community and referral partnerships — Existing-customer referrals

Enable — Commercial SEO landing pages — Retargeting — CRM attribution and fast response

Postpone — Broad cold social — Nationwide expansion — Call center and real-time booking

Organize intent around customer decisions

Commercial landing pages come first. Informational volume comes after conversion and economics are understood.

Offer — private Europe tour • Arabic guide • family itinerary

Departure — Europe tours from Houston • private trips from Houston

Trust — how booking works • cancellation • insurance • visas

Destination — Italy–Switzerland • Paris–Disney • Central Europe

Make every handoff measurable

Lead captured — Source, offer, dates, party

Acknowledged — Immediate expectations

Qualified — Fit, budget, timing

Quoted — Versioned itinerary

Deposit pending — Terms + expiry

Won / lost — Margin + reason

Fast response and disciplined pipeline ownership matter more than a call center at launch.

Post-trip — Review + referral

Resolve operating gates before paid acquisition

ENTITY + PAYMENTS — Verify U.S. legal entity, banking, merchant, and tax setup

TERMS + DISCLOSURES — Cancellation, supplier confirmation, privacy, consent, insurance, visa responsibility

MARKET LICENSING — Counsel confirms Texas and later-state obligations

PROOF + SUPPORT — U.S. support expectations, traveler proof, escalation path

Compliance observations are strategic research, not legal advice.

Optimize for contribution-margin CAC — not cheap leads

Gross profit dollars - variable sales cost - payment cost - service leakage = contribution margin

CAC — By channel + offer

Lead - qualified — Sales quality

Qualified - deposit — Commercial conversion

Refund / change cost — Operational leakage

Response time — Service discipline

Referral rate — Trust compounding

Sequence readiness, launch, and learning

Days 1–30 — Foundation — Legal/payment readiness • 5–8 offers • USD logic • terms • CRM events

Days 31–60 — Controlled launch — Search • referrals • landing pages • sales scripts • retargeting

Days 61–90 — Decision cycle — Offer/channel review • margin cohort • supplier reliability • scale/stop calls

The unanswered operating questions determine scale

High — U.S. entity, payments, licensing, insurance responsibilities

High — Actual package-level gross profit and supplier confirmation reliability

Medium — English staging site and analytics / CRM readiness

Medium — Local Houston advantage and accountable sales ownership

Medium — Review permission, response SLA, refund and change operations

One market. One audience. One measurable engine.

Build the conversion and operating system first. Broaden geography only after proof.

MARKET — Houston metro

AUDIENCE — Bilingual MENA families

OFFER — 5–8 Europe-led packages

CONVERSION — Quote advisor deposit

ACQUISITION — Search + community + referral

DECISION — Scale only on contribution margin
